About EMspec

EMspec designs clocks that replace pointers and numbers with light to draw time away from them, emphasizes the craftsmanship and creates a time-displaying device that the public is not familiar with but simple and easy to understand. Redefine the role of the "clock" in space for consumers who are intentionally differentiated, personalized, and pursue the optimization of the quality of their living or work environment. Not only do we bring products to where full of creativity and design but also a fun topic to life.

EMspec Design Clock

transforms time into the most treasured scenery in space

EMspec is a clock design brand of the new generation. With the original design concept and superior craftsmanship, time recognition has been elevated to another level, emphasizing the withdrawal of "pointers" and "numbers". Clocks are turned into home décor and redefine the notion of "clock" in space.

EMspec's designers are experts in using diverse and interesting elements, adopting conscious craftsmanship. The clock brings a warm and beautiful emotion to space on the basis of modern aesthetics. Finally, Emspec presents a simple and balancing aesthetic, turning clocks into the most treasured beauty in space.

Since then, clocks are not just machines of precision, but to endow with the means of easing our lives.

In the past, the idea of time was a perception of light and darkness. However, through the designer's multi-dimensional thinking, "light" and "darkness" directly embedded into the time-identifying media - "clock". As the EMspec brand name, "EM" is the abbreviation for "Evening & Morning". The alternation of day and night formed the base of time which is also the initial concept of our clock design.

"Is a clock for keeping time, a daily necessity, or an interior decoration? We trust that most think of it as a timepiece. But through design, EMspec has sought to make clocks not just machines of precision, but to endow them with the means of easing our lives."

Quadrant Clock

wall clock

aggregate of aluminium, glass, acrylic
slight color variations might occur due to color anodized production
indoor use | handmade designed & made by EMSpec

H38 W80 D1.8 cm

QUADRANT

Wall Clock

QUADRANT

Wall Clock

"Quadrant Clock" is a wall clock inspired by "Cartesian coordinate system" created by René Descartes. Uses the light as the medium for transforming time into the 2-dimensional crossed light. The design of the Quadrant Clock is both linear and modern suitable for a variety of indoor spaces. When every hour comes, this wall clock will stage a short light show. Like a meteor under the stars, the clock in the space is no longer boring but can reinterpret the uniqueness of time and unite time with people.

The designer uses the simple interlacing of light dots with a warm and simple design style, transforming time into the 2-dimensional crossed light, presenting an inclusive design spirit.

Matte black-Gold edge

Elegant rose gold

The frame of Quadrant Clock is manufactured with multi-axis CNC machining to create a very smooth and shiny cut surface.

Swirl Clock

floor clock

aggregate of aluminium, stainless steel, iron, glass, PC
slight color variations might occur due to color anodized production
indoor use | designed & made by EMSpec

H170 W30 D30 cm

SWIRL
Floor Clock

SWIRL

Floor Clock

"Swirl Clock" is a new type of floor clock with classical spiral design, cleverly use of arrangement and light, blending visual effect and imagination. Aesthetically unique and balanced, achieving the original elegance of time.

The current time is displayed intuitively with 12 light balls in different color temperatures and relative positions. With the hourly light show performing, the spiral beam drags out an infinitely extending light-trail; creates a sense of beauty and harmony in indoor spaces. modern aesthetic.

EMspec design clocks are almost entirely handmade with extreme craftsmanship. It redefines the role of clocks in interior spaces, and transforms the clock into a touching modern aesthetic.

"Swirl Clock" is sophisticatedly designed, stitched tightly and integrated. The main tube is made of stainless steel tube polished by the master craftsman.

The light ball can be divided into two parts, the upper shade of warm light represents "minutes", the lower shade of white light is "hour", showing the new look of the clock design. The Japanese famous Nichia LED energy-saving light bulb is used.

A golden metal ring made by CNC diamond cutting machine surrounds the candle light ball. The hairline texture is visible on the surface of each ring.

"Swirl Clock" glass base. The brand logo is UV printed on the reverse side of the semi-reflective glass .
